

Active receiver multicoupler for UHF band (380-470MHz) in two sub bands with integrated bandpass filter.

Front panel user adjustable insertion loss or nominal gain between 0 to +3dB.

Passive Band Pass filter designed to pass 3 to 5MHz bandwidth with 2dB pass loss.

Compact system design in a 1.5U 19" rack design for up to 8 channels and 2U for 16 channels.

High dynamic range amplifier with very low Noise Figure of less than 3dB.

High isolation of over 20dB between receiver output ports.

Low RF output power imbalance between ports.

Strong RF input capability.

100-240V AC mains input and 12-24V DC input.

Automatic change over from AC to DC power and vice versa in case of either power input failure.

Separately fused AC power and front panel mounted DC fuse.

Amplifier power "On" LED on front panel for easy status check.

N-Type input and output connectors, other types available on request.

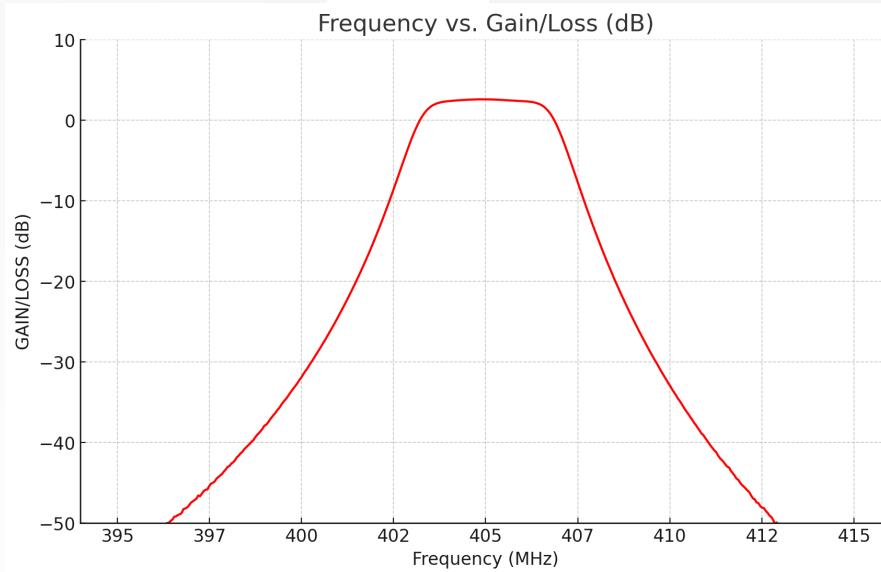

Mavitek blue or customer RAL code electrostatic powder painted front panel with anodized aluminum casing.
